

MATRIX

Leading innovation

MATRIX COMPACT

A new generation of
secured key control systems

CONTROL YOUR KEYS

PROTECT YOUR ASSETS!

MATRIX COMPACT

MATRIX COMPACT is a modular desktop unit with maximum capacity of 384 keys

The system allows full control of your keys and assets in a way you've never seen before...

Unlike other systems where anyone who opens the front door can tamper or steal any key in the cabinet, MATRIX protects each key in a separate locked compartment with no ability to access without manager permissions

In addition, every operation made is video recorded for future monitoring

MATRIX software contains many advanced and unique features allowing you to stay in full control over keys usage in your organization

The system arrives with a large 15" touch monitor and voice guidance as standard making the operation extremely easy
