

Key management system

MATRIX
LEADING INNOVATION

The **CONTROL** you **WANT**
with
the **SECURITY** you **NEED!**

DO YOU REALLY HAVE CONTROL?

Do you know who took the key?

When it was taken?

Why it was taken?

Do missing keys sound familiar?

MATRIX

MATRIX is a premium key management system which allows full control of your keys and assets

With our systems, controlling your keys has never been easier - you will be able to decide who has access to each key and receive real-time data regarding who took what, when and for which purpose

MATRIX offers the highest level of security to your assets as each key is secured in a sealed compartment and every transaction is captured by a dedicated video camera

“We choose MATRIX since other than control it provides the highest level of security to our keys and assets. In addition, it has massive capacity to contain all our keys in only one cabinet - with any other systems we would have needed at least 3 units.

The MATRIX is truly the best key management system I've seen”

Jonathan Eltes
Dealer Principle
Mercedes-Benz Brampton

Simple

1 Identify
Biometric / RFID Tag Pin code

2 Select a key
According to personal authorizations

3 Receive access
To the requested key only

Secured

The MATRIX is nothing like any other key cabinet! It gives us peace of mind knowing our keys are protected along with all the management features we need

*Kelly G McNeil
SUNSET CHEVROLET, WA*

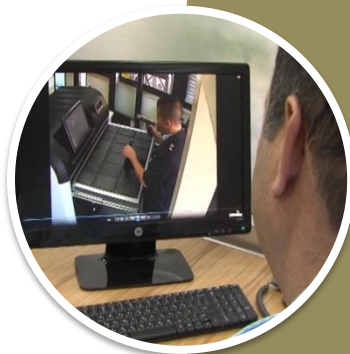

MATRIX provides the highest level of protection to your keys and assets.

Unlike other systems, where anyone who opens the front door can steal or duplicate any key in the cabinet,

MATRIX protects each key in a separate locked compartment with no ability to access without manager permissions.

MATRIX FRAME

Video Records

For an even higher level of security, a dedicated camera can be added to capture every transaction

Using cross-cutting reports, now you can also have visual of every activity made

Control

The MATRIX has a power software with many unique features that provide you better control along with the security level you need.

Limit system access to working hours only

Limit the number of keys that a user can hold at the same time

Deny user access when driving license expired (for vehicle keys only)

Require users to report check out reason

Determine due date of each key

Send alerts when a key wasn't returned on time (user + manager)

Allow users to report parking location and vehicle condition

Document every transaction by video camera

Send alerts when a drawer was forced open and start the camera

Control from a remote location

Flexible

Fits your needs

Design your own drawers by selecting any combination of our 19 bins sizes

No minimum drawers per cabinet

Order what you need and grow upon demand

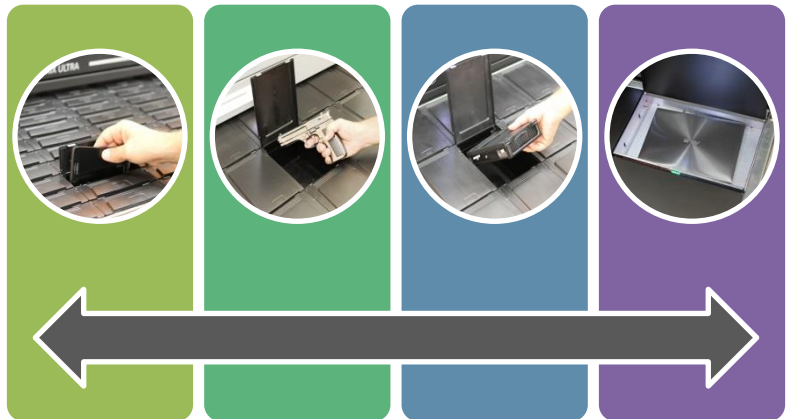

Do more with your key system

Use MATRIX to protect and control any other valuable items such as license plates, handheld computers, cell phones, firearms and more.

All in the same cabinet!
